

**Antibiogram 2020, Inpatient**  
**St. Luke's Hospital**  
 915 E. 1<sup>st</sup> Street, Duluth, MN 55805

Isolate	Escherichia coli	Proteus mirabilis	Klebsiella pneumoniae	Enterobacter cloacae	Pseudomonas aeruginosa	Staphylococcus aureus <sup>2</sup>	Staphylococcus epidermidis	Enterococcus faecalis	Enterococcus faecium	Streptococcus pneumoniae
No of isolates *	248-329	29	85	11-40	51	20-183	13-64	49-79	11-25	3
*Number of isolates vary due to site specific antibiotic panels										
<b>Antibiotic % Susceptible (duplicate patient isolates deleted over 4 week period)</b>										
<b>Azithromycin</b>										
<b>Ampicillin</b>	63	83	0	0				100	24	
<b>Amox/Clav</b>						63	28			
<b>Cefazolin</b>	86	93	96			63	28			
<b>Ceftazidime</b>	93	100	98	82	86					
<b>Ceftriaxone</b>	92	100	96	74						
<b>Ciprofloxacin</b>	79	83	96	97	80					
<b>Clindamycin<sup>3</sup></b>						82	49			
<b>Erythromycin</b>						51	41			
<b>Gentamicin</b>	96	90	98	97	82	100	88			
<b>Linezolid</b>						100	100	100	96	
<b>Meropenem</b>	100	100	100	100	96		75			
<b>Moxifloxacin</b>						92	75			
<b>Nitrofurantoin<sup>1</sup></b>	96	0	40	10		100	100	100	45	
<b>Oxacillin</b>						63	28			
<b>Penicillin</b>							63	100	24	
<b>Pip/Tazobact</b>	92	100	100	92	92					
<b>Rifampin</b>						99	98			
<b>Tetracycline</b>						94	77			
<b>Tobramycin</b>	100	90	98	100	96					
<b>Trimeth/Sulfa</b>	92	97	95	92		100				
<b>Vancomycin</b>						100		1		

<sup>1</sup>Antibiotic for urine isolates only

<sup>2</sup>Staph aureus results from nose screen cultures for MRSA were not included

<sup>3</sup>Clindamycin susceptibility for S. aureus and S. epidermidis adjusted to include inducible resistance

\*\*Possible beta-lactamase producer.

This Antibiogram is prepared exclusively for use by medical staff at St. Luke's Hospital; any other use is without permission.
