

Antibiogram 2020, Outpatient

St. Luke's Hospital

915 E. 1st Street, Duluth, MN 55805

Isolate	Escherichia coli	Proteus mirabilis	Klebsiella pneumoniae	Enterobacter cloacae	Pseudomonas aeruginosa	Staphylococcus aureus ²	Staphylococcus epidermidis	Enterococcus faecalis	Enterococcus faecium	Streptococcus pneumoniae
No of isolates *	311-326	18	35-37	5-9	19	13-65	7-16	24-26	3	0
*Number of isolates vary due to site specific antibiotic panels										
Antibiotic % Susceptible (duplicate patient isolates deleted over 4 week period)										
Azithromycin										NA
Ampicillin	64	89	0	0				100	33	
Amox/Clav						45	44			
Cefazolin	94	89	86			45	44			
Ceftazidime	97	94	95	78	100					
Ceftriaxone	96	94	95	78						
Ciprofloxacin	87	94	95	100	89					
Clindamycin³						77	67			
Erythromycin						37	56			
Gentamicin	95	89	97	100	84	98	100			
Linezolid						100	100	100	100	
Meropenem	100	100	100	100	100					
Moxifloxacin						96	78			
Nitrofurantoin¹	97	0	51	40		100	100	100	33	
Oxacillin						45	44			
Penicillin							19	100	33	
Pip/Tazobact	99	100	95	100	100					
Rifampin						97				
Tetracycline						92	100			
Tobramycin	96	89	92	100	100		75			
Trimeth/Sulfa	83	94	95	100		100	71			
Vancomycin						100	100	100	67	

¹Antibiotic for urine isolates only

²Staph aureus results from nose screen cultures for MRSA were not included

³Clindamycin susceptibility for S. aureus and S. epidermidis adjusted to include inducible resistance

**Possible beta-lactamase producer.

This Antibiogram is prepared exclusively for use by medical staff at St. Luke's Hospital; any other use is without permission.
