

Should I Get Tested for COVID-19?

People who have symptoms should get tested. People who do not have symptoms generally should not be tested for COVID-19.

Please check the box for as many symptoms as you are currently experiencing.

Are you experiencing symptoms of COVID-19? Symptoms can include:

- Cough
- Shortness of breath
- Fever
- Chills
- Headache
- Sore throat
- Congestion or runny nose
- Muscle pain
- Loss of taste or smell
- Other less common symptoms include gastrointestinal symptoms like nausea, vomiting, or diarrhea.

Please circle **YES** or **NO** response to each question below.

Have you been contacted by public health and told you were in close contact with someone known to have COVID-19 or have you been within 6 feet for longer than 15 minutes of a confirmed positive COVID-19 person?

YES NO

Has your physician or provider ordered a test and instructed you to get tested at this location?

YES NO

If you answered no to all the questions above, you will not be tested. If you answered yes to any of the questions above, you may be tested.

It is extremely important that you practice the precautions ordered by the Minnesota Department of Health.

Please take these steps IMMEDIATELY:

- Practice self-isolation and social distancing. Stay home!
- Please wear a mask.
- Wash your hands regularly for 20 seconds with soap and water.
- Regularly disinfect commonly touched areas.
- If you have an emergency or life-threatening problem, call 911.

If you have been tested:

- Test results will take several days to be received and you will be contacted with results when available.
- Please isolate yourself at home and remain greater than 6 feet from others until you receive results AND your symptoms improve.
